Green Ore (GROR) – Whitepaper

Token Name: Green Ore

Symbol: GROR

Blockchain: TON (The Open Network)

Total Supply: 989,999,998,800,849 GROR

Introduction:

Green Ore (GROR) is a utility token designed to power a blockchain-based survival game. It enables seamless in-game transactions, crafting, upgrades, and rewards in a secure and decentralized environment.

Core Utilities:

- Crafting tools, weapons, and shelters
- Trading with NPCs and players through decentralized marketplace
- Unlocking exclusive missions, cosmetics, and abilities
- Governance features (future): vote on in-game economic changes
- Staking for rewards and access to premium content

Tokenomics:

- 50%: In-game rewards and play-to-earn mechanics
- 20%: Staking & liquidity pools
- 15%: Development & marketing
- 10%: Team and advisors (vested)
- 5%: Reserve fund

Roadmap Highlights:

- Q3 2025: Launch initial DEX listing on Ston.fi (TON DEX)
- Q4 2025: Launch public Alpha of the survival game
- Q1 2026: Introduce NFT item drops using GROR
- Q2 2026: Governance voting, mobile release, and community events

Community & Ecosystem:

Green Ore will build an open ecosystem with NFT integration, DAO governance, and partnerships with gaming guilds and TON-based platforms. GROR is central to creating a player-driven economy.

Security & Transparency:

- Open-source smart contracts
- Token audit and verified contract address
- Public supply tracking on DYOR.io and Tonviewer
